

Built to Last. Designed to Perform.

SEPTIC & PORTABLE SANITATION TRUCKS

www.imperialind.com

Precision Engineering. Proven Quality.

At Imperial, precision engineering isn't a tagline — it's how we build. Every septic and portable sanitation truck we build starts with thicker materials, tighter tolerances, and craftsmanship refined over 45 years of experience. Our tanks are engineered for real-world performance, where durability, reliability, and simplicity matter most.

Proven quality comes from the people behind the work. From welders and fabricators to engineers and service techs, each build reflects the pride of a team that understands the demands of your routes and the importance of keeping your fleet running strong. When you choose Imperial, you're choosing equipment designed with care, built to last, and supported by partners who stand behind every truck.

ENGINEERED & **BUILT TO LAST**

Stronger materials. Smarter construction. Longer service life.

- One-piece welded construction
- Heavy-gauge steel, aluminum, and stainless materials
- Pump and blower systems selected for durability
- Seamless integration with your engineered specifications
- Designed to perform in harsh, daily, real-world conditions

SPEED + CONTROL = **CERTAINTY**

Predictable builds that keep your routes moving.

- Predictable lead times and clear communication
- Streamlined build process for less downtime
- Optimized plumbing and layout for faster service
- Wireless remote options for precise operator control
- Consistency you can count on, route after route

A PEOPLE-FIRST **PARTNERSHIP**

Real relationships, before and after delivery.

- Direct access to real humans — no call centers
- Guidance on tank size, pump packages, and chassis selection
- Transparent updates from start to delivery
- Built by skilled craftsmen in Central Wisconsin
- Long-term service and support from people who care

Built Around **Your Operation.**

Imperial septic and portable sanitation trucks are designed for the realities of field work — from daily septic pumping and portable sanitation servicing to event support, grease trap cleaning, emergency

response, municipal service, and industrial facility maintenance across demanding environments. Every build balances capacity, control, and durability to keep your operation running with confidence.

ENGINEERED TANK SOLUTIONS

Built to match your routes and service mix.

- 700–6,200 gallon capacities
- Steel, aluminum, or stainless construction
- Single, dual or three compartment tanks
- Hoist tanks and full-opening rear doors
- Fresh water + waste configurations

RELIABLE POWER & CONTROL

Performance where it matters most.

- Proven pump and blower systems
- Wireless remote capabilities
- High-performance jetter options
- Clean, service-friendly plumbing layouts

ONGOING SERVICE & SUPPORT

Our relationship doesn't end at delivery. Imperial's service team helps keep your equipment running efficiently throughout its lifecycle.

- Pump and blower diagnostics, repair, and rebuild
- DOT inspections, repairs, and recertifications
- Plumbing upgrades, heated jackets, and custom solutions
- Replacement parts and service components
- Seasonal maintenance programs

TRUSTED CHASSIS PLATFORMS

Support That Keeps You Moving.

Your routes go year-round, and your equipment should too. That's why Imperial builds trucks with stronger materials, reliable performance, and thoughtful layouts — backed by a team that understands service work and supports you long after delivery.

WHY OPERATORS CHOOSE IMPERIAL

Longer tank life. Consistent field performance. Predictable timelines. **Built in Central Wisconsin by people who take pride in every truck.**

READY TO BUILD YOUR NEXT TRUCK?

Let's talk through your routes, service mix, and capacity needs. We'll put together a build that's ready for work on day one.
